

Version 2005-Oct-06 Codebook

 VARIABLE DESCRIPTION FILE
 2000 PRE-POST STUDY
 (2000.T)

=====
 VERSION Process.1. ANES VERSION NUMBER OF DATA
 Numeric

Process1.

VERSION NUMBER

 This is the 2-digit number corresponding to version
 of the data file. (The initial release of the raw data
 file is data version 01.) See the introductory section
 of this codebook for note on "version" and "dataset".

=====
 DSETID Process.2. ANES DATASET NUMBER
 Character

Process2.

ANES DATASET NUMBER

 Dataset number 2000.T.
 See the introductory section of this codebook for note on
 "version" and "dataset" numbers.

=====
 ICPSRNO Process.2a. ICPSR ARCHIVE NUMBER 3131
 Numeric

Process2a.

ICPSR ARCHIVE NUMBER 3131

 This is the study number within the ICPSR archive.

=====
 V000001 Process.4. Case ID
 Numeric

Process.4.

ANES 2000 CASE ID

 ANES 2000 Case ID corresponds to the Pre-election ID.
 There are gaps in the numbering (0001-1812)

=====
 V000001a Process.4a. Post ID
 Numeric

Process.4a.

POST ID

There are gaps in the numbering.

0001-1557 Pos Interviews
2001-2254 Post non-interviews

=====
V000002 Process.5. Sample weight
Numeric DEC 4

Process.5.

Sample weight

This is a 6-digit variable with a coded decimal point and 4 actual decimal places.
A poststratification adjustment using the 2000 CPS March Supplement estimates as the standard was done for the combined RDD and area samples. The cells were formed by crossing 6 age groups by 4 levels of education. The age groups were: 18-29, 30-39, 40-49, 50-59, 60-69, 70+. The education levels were: < high school graduation, high school graduate, some college, and 4 years of college or more.

=====
V000002a Process.5a. Post weight
MD: EQ 0
Numeric

Process.5a.

Sample weight for Post variables

This is a 6-digit variable with a coded decimal point and 4 actual decimal places.

0. No Post IW

=====
V000003 Process.6. Pre only or Pre-and-Post
Numeric

Process.6.

Pre only or Pre-and-Post

0. Pre-Election and Post-Election interviews
1. Pre-Election Interview only

	0	1
Count	1555	252

=====
V000019 Pre.Admin.16. Tape recorded?
Numeric

Pre-Admin.16.

PRE: Tape recorded?

New interviewers had to tape record 2 of their first 5 production interviews; experienced interviewers were required to tape record 1 of their first 3 production interviews (FTF or phone). Tape recording was conducted with the respondent's permission. The IWR made a self-evaluation and sent the tapes to their field supervisor.

- 1. Yes
- 5. No

	1	5
	-----	-----
Count	161	1646

=====
V000020 Pre.Admin.17. Verification
Numeric

Pre-Admin.17.

PRE: Verification

Approximately 15 percent of interviews (completed or partially completed) were randomly selected and verified by field supervisors for new interviewers, and 6 percent were randomly selected and verified for SRC-experienced interviewers.

Verification was attempted by phone (phone interviews) or by letter (FTF interviews) within 3 days of interview date. If no contact/response with the respondent was made after 3 attempts, a replacement line was selected. The respondent was asked whether they were interviewed by the interviewer of record, the approximate length of the interview and whether or not the interview was interesting; in addition, 3 questions were asked about content of the interview. NOTE: for verification codes, a "don't remember" response is considered a non-match.

- 0. Counted for Ann Arbor office, not selected for verification

1. Flagged for verification (interview number selected)
2. Verified OK (all verification data match original data exactly)
3. Verified with discrepancy (only one piece of verification data does not match; everything else matches exactly)
4. Not verified (more than 1 piece of information reported by the respondent at the time of verification is different from that collected at the time of the original interview or finalizing the case; further probing results in assignment of either code 3 or code 4 as a final code)
5. Unable to verify (R is contacted but is unwilling to participate in verification exercise or the respondent cannot be reached; this includes: reaching the household by telephone but not reaching the respondent, and includes sending the verification letter to a household but no letter returned after 3 attempts)
6. Verification limit met (used when the verifier has already completed the needed verification level).

=====
V000022   Pre.Admin.19. Conversion indicator
          Numeric
```

Pre-Admin.19.

PRE: Refusal conversion indicator

This refers to interviews initially refused by someone when an interviewer was first attempting contact. The source of this refusal may or may not have been the Respondent; result code 43 [contact, resistance by R] or 46 [resistance not by R] for any call (not the final

result code) turns this indicator on.
 Conversion may be made by the initial interviewer or another interviewer. If the conversion is not made by the initial interviewer, the interviewer of record is the interviewer obtaining the conversion.

- 0. Not a refusal conversion situation
- 1. Refusal conversion situation indicated

Pre-CSheet.2.

PRE - COVERSHEET:
Color of coversheet

FTF coversheets were blue or green.
Telephone coversheets were yellow.
GREEN COVERSHEETS: used by FTF interviewers when updating
the area probability sample. Type II updates involved addition
of unlisted (hidden) HUs at the selected listed address: for
example, once the IWR was inside the HU, he or she may have
noticed that the house was divided into separate and complete
apartment units that were not apparent from outside. Each
interviewer received a set of unlabeled coversheets that had a
provision for adding up to three unlisted HUs discovered at the
listed address.

1. Blue
2. Yellow

 V000038 Pre.CSheet.7. Selection table
 MD: EQ 9
 Numeric

Pre-CSheet.7.

PRE - COVERSHEET
 HOUSEHOLD LISTING:
 Selection table

The Selection Table is used to select a respondent from all household members who are eligible adults. (An eligible adult is a U.S. citizen who is 18 years of age or older by Election Day.) The Selection Table appears on the Coversheet below the Household Listing.

After a complete listing of the HH is taken, each eligible adult is assigned a "Number" based on the criteria of gender and age [beginning with the oldest male as number 1, males are numbered by increments of 1 according to descending age; females are numbered by descending age starting with the number one higher than that assigned to the youngest male]. The interviewer then uses the Selection Table to determine the "Number" of the eligible adult to be interviewed.

The Selection Table itself consists of 2 parallel

V000041 Pre.CSheet.10. Household composition
MD: EQ 99
Numeric

Pre-CSheet.10.

PRE - COVERSHEET
HOUSEHOLD LISTING:
Household composition

The HH composition code is derived from information provided in
the household listing. "Adults" are 18 years of age (by
election day) or older; all individuals included in the HH
composition codes below refer to adults.

A designation of a HH member as "the householder" (HHR)
describes HU member who owns or rents the home (in whose
name the lease is held). Cohabiting couples are coded as
married (30,40, 50-52). Roommates of opposite sex are
coded 11,12,21,22; in all cases of unrelated roommates the
respondent is HHR.

If R identifies self as married/partnered but spouse/partner

V000262 Post.Summary.24. Flag-Post rand failure
MD: EQ 9
Numeric

Post-Summary.24.

POST: Flag - randomization failure in Post admin

On 11/16/00 it was discovered that the survey instrument program had an error in setting randomization. Interviews --or, for some interviews administered over several days, portions of interviews --that were conducted prior to the correction of this error (in the 2nd VQ released on 11/16/00) were not administered with correctly functioning randomization. All cases administered prior to the correction of this error were administered as if only one choice in the randomization were available (in almost all cases, an identical choice).

The randomization variables documented in V001752-V001810 describe the types of randomizations affected.

- 0. No randomization failure
- 1. Post randomization failure in at least a portion of the interview
- 9. No Post IW

 MD1: EQ 0, MD2: GE 8
 Numeric

A5c.

Is there anything in particular about George W. Bush
that might make you want to vote against him?

The order of the A4 series ('likes' and 'dislikes' about
Gore) and the A5 series ('likes' and 'dislikes' about GW
Bush) was randomized.

Randomization: Randomization is documented within the
collection of randomization variables that appear at the end of
the Pre survey vars. The question numbers for randomization
variables closely follow survey question numbers, preceded by
"Rand" [e.g. for questions A4/A5 there is a randomization
variable Rand.A4/A5].

V000446 G6x1. Summary self plcmnt lib-con scale/brnch
 MD1: EQ 0, MD2: GE 8
 Numeric

G6x1.

BOTH 7-POINT SCALE AND BRANCHING LIB-CON SERIES:

7-POINT SCALE FTF: Where would you place yourself on this scale, or haven't you thought much about this? If you had to choose, would you consider yourself a liberal or a conservative?

7-POINT SCALE PHONE: When it comes to politics, do you usually think of yourself as extremely liberal, liberal, slightly liberal; moderate or middle of the road, slightly conservative, conservative, extremely conservative, or haven't you thought much about this? If you had to choose, would you consider yourself a liberal or a conservative?

BRANCHING (FTF AND PHONE):

When it comes to politics, do you usually think of yourself as a liberal, a conservative, a moderate, or haven't you thought much about this?

If you had to choose, would you consider yourself a liberal or a conservative?

Would you call yourself a strong liberal or a not very strong liberal?

Would you call yourself a strong conservative or a not very strong conservative?

COMBINED 7-POINT LIB-CON SELF-PLACEMENT FROM 7PT SCALE /BRANCHING

Built from:

- branching data in G6.E, G6a.E, G6b.E, G6c.E.
- 7-pt scale data in G1ax, G1b.

NOTE: To make 7pt scale data comparable with the construction of a 7-pt summary of branching data, both the 7pt-scale data in G1ax and the "had to choose" data in G1b were used for constructing this summary. For both 7pt-scale and branching cases, Rs who answered moderate (4 in 7pt-scale) or DK or 'haven't thought much' (branching: or 'neither') were asked for the "had to choose" selection of liberal or conservative. Branching: If R selected liberal or conservative but strength followup was missing data (typically: DK) then 'not strong' has been coded in G6x1.

Note: when using combined-mode summaries (combining face-to-face 7-point scales with telephone branching summaries), users must be fully aware of the differences in the questions, administration, and summary construction by mode; it is up to the individual user to evaluate the importance of those differences for his individual purposes.

1. SCALE: 1 / BRANCHING: strong liberal
2. SCALE: 2 / BRANCHING: not strong liberal

IF R IS UNEMPLOYED AND HAS EVER WORKED FOR PAY: /
IF R IS DISABLED AND HAS EVER WORKED FOR PAY:

What is/was your main occupation? What sort of work
do/did you do?

STACKED - 2 DIGIT OCCUPATION CODE

See notes Y6.
Built from Y7a(1), Y10a(1), Y12a(1), Y14a(1).
This variable combines employment data for all Rs except
nonworking homemakers and students (i.e., their data for
employment in the past 6 months are omitted).
The disabled and homemakers or students who are also
currently working have their current occupation from
Y7a coded here. Retirees who are also currently
working have past occupation from Y12a coded here
rather than current occupation in Y7a. If R is disabled
and not working but has worked in the past, or if R is
unemployed, then past employment is represented here.

The original 3-digit 1990 US Census Occupation variable
has been recoded into 71 subgroups, in order to protect
Respondents' anonymity.
See CENSUS OCCUPATION Master Code.

 MD1: EQ 0, MD2: GE 996
 Numeric

Y17(7).

IF R IS WORKING NOW OR TLO/ :
 IF R IS RETIRED BUT HAS WORKED IN PAST 6 MONTHS: /
 IF R IS UNEMPLOYED BUT HAS WORKED IN PAST 6 MONTHS: /
 IF R IS DISABLED BUT HAS WORKED IN PAST 6 MONTHS:

About how many hours do/did you work on your job in the average week?

STACKED - HOURS WORKING/WORKED PER WEEK

See notes Y6.

Built from Y7e, Y10f, Y12f, Y14f.

This variable combines data for all Rs currently working or who have worked within the past six months:

- Employed or temp. laid off [present employment Y7e],
- Unemployed [employment within past 6 months Y10f],
- Retired [employment within past 6 months Y12f],

- Permanently disabled [employment within past 6 months Y14f].

Note that homemakers or students without current outside employment are coded 00 [Y16f data are NOT used]. The disabled and homemakers or students who are also currently working have data for their current occupation from Y7e coded here. For retirees, since data for number of hours worked describes recent employment within past 6 months, this may in effect describe pre-retirement employment (i.e. for very recent retirees), current employment (i.e. for working retirees at a post-retirement job that has been held in the last 6 months), or employment that is neither pre-retirement nor a current job but rather an interim position.

INTERVIEWER CHECKPOINT:
IS R THE ONLY HOUSEHOLD MEMBER AGE 14 OR OLDER?

Note: This variable was completed by interviewers. In 67 cases, households corresponding to more than 1 adult were incorrectly coded 1 in this variable; as a result of the effect upon the skip pattern, household income was not asked. For these cases, the following revisions have been made to the original data: V000992 recoded to 5; V000993 [HH income] and V000994 [HH income summary] recoded to 00 NA; V000995 [R income] assigned the value formerly coded in V000996; V000996 recoded to 96 Inap.

V001011 Y30c. Choice of ethnic/nationality group
 MD1: EQ 0, MD2: GE 98
 Numeric

Y30c.

IF MORE THAN 1 NATIONALITY/ETHNIC GROUP IDENTIFIED:

With which of these groups do you most closely identify?

CHOICE - ETHNIC OR NATIONALITY GROUP

See ETHNICITY master code.

Rs giving only 1 mention to Y22 were not asked this question; their single response to Y22 has been duplicated in this variable.

Note that this variable was coded according to IWR indentification of number of ethnic groups mentioned; in some instances, the IWR counted only 1 mention when in fact more than 1 was given by R. For such cases, the 'choice' variable (Y30c) was unasked.

Codes 1-89,91-94 and:

- 90. None; neither
- 95. Both/all of them
- 96. 'American'
- 97. Other group; combinations not codeable elsewhere

V001012 Y30x/Y31. Spanish or Hispanic descent
        MD1: EQ 0, MD2: GE 8
        Numeric

```

Y30x/Y31.

INTERVIEWER CHECKPOINT:
 IS SPANISH OR HISPANIC GROUP MENTIONED AS MAIN GROUP?
 (IF NO:)
 Are you of Spanish or Hispanic origin or descent?

IS R OF SPANISH OR HISPANIC ORIGIN OR DESCENT

The question about Spanish or Hispanic descent was directed to the respondent at the interviewer's discretion if the interviewer decided that R had not already mentioned a Spanish or Hispanic group in the ethnicity mentions. In a few cases, mentions coded 4,5,8,12 or 16 in Y30b(1) or Y30b(2) contradict what has been coded in this checkpoint.
 Note that, if R gave more than 2 mentions in Y30, the code for the specific Spanish or Hispanic group may not be represented in the 2 variables for Y30.
 See also Pre-Csheat.37 and Pre-Csheat.28 (V000068,V000069) and Post-Csheat.32 and Post-Csheat.33 (V000184d, V000184e).

C1.

In talking to people about elections, we often find that a lot of people were not able to vote because they weren't registered, they were sick, or they just didn't have time.

Which of the following statements best describes you:
One, I did not vote (in the election this November);
Two, I thought about voting this time - but didn't;
Three, I usually vote, but didn't this time; or
Four, I am sure I voted?

[INTERVIEWER: PLEASE READ ALL OPTIONS]

1. I DID NOT VOTE (IN THE ELECTION THIS NOVEMBER).
2. I THOUGHT ABOUT VOTING THIS TIME, BUT DIDN'T.
3. I USUALLY VOTE, BUT DIDN'T THIS TIME.
4. I AM SURE I VOTED --> SKIP TO C3

C9(2).

IF R VOTED:

CHECKPOINT: RANDOM ORDER OF DEMOCRATIC/REPUBLICAN CANDIDATE NAMES

This describes, for House vote and nonvoter House preference, the order in which names appeared on the FTF ballot card or the order in which names were read in Telephone administration.

NOTE: in VT01 and VA05, the independent incumbent candidate was randomized, in the FTF ballot card and in the order of names in the Telephone wording, as if the candidate were a major party candidate: VT01 candidate Bernie Sanders was randomized as if a Democratic name, and in VA05 Virgil Goode Jr. was randomized as if a Republican name (no Democratic name was preloaded for VT01 and no Republican name was preloaded for VA05).

All other ind/3rd-party candidate names appearing on the FTF ballot card or included in Telephone wording appear last in order.

NOTE: ind/3rd-party candidate names are included in response codes/question wording whenever they have been preloaded; ind/3rd-party names are preloaded only for candidates who have been identified as especially viable. See note concerning randomization failure in V000262.

1. Democratic names first (FTF: BLUE BALLOT CARD)
2. Republican names first (FTF: GOLD BALLOT CARD)

Who did you vote for?

TELEPHONE:

Did you vote for
 (the Democrat, <NAME>, or)
 (the Republican, <NAME>)
 (IF IND/3RD PARTY CANDIDATE: or the <PARTY> candidate,
 <NAME>?)

See C9(2) for the order in which names were presented on the ballot card/ read over the phone.

The names of independent/3rd party candidates were present on the ballot card or read to the respondent only if that candidate's name was on the candidate list (preloaded into the instrument).

Code 7 includes cases where R volunteered that he/she voted "a straight ticket" but no candidate for R's party ran; it also includes cases where R insists that he/she voted for a specific party's candidate but no candidate from that party ran in R's district.

CODE 6 NOTE: In 8 cases where R resided in county of interview, R did not select one of the names from the district of the interview location but provided a name which was later identified as belonging to another congressional district. These cases have been coded 6 in V001255 but the candidate code and party identification according to the other district are coded in V001256 and V001257. In Pre-Sample.7 (V000085) and Pre-Sample.8 (V000086) these cases are coded as a vote outside CD of interview.

TELEPHONE: The order in which the names of the major party candidates was read was randomized [see C9(2)]. If an independent/3rd party candidate was on the candidate list, his/her name was read last.

1. <PRELOAD DEMOCRATIC CANDIDATE NAME>

Did you vote for

(the Democrat, <NAME>, or)
 (the Republican, <NAME>)
 (IF IND/3RD PARTY CANDIDATE NO.1: [or] the <PARTY>
 candidate,<NAME>?)
 (IF IND/3RD PARTY CANDIDATE NO.2: or the <PARTY>
 candidate,<NAME>?)

See C9(2) for the order in which names were presented on the ballot card/ read over the phone.

The names of independent/3rd party candidates were present on the ballot card or read to the respondent only if that candidate's name was on the candidate list (preloaded into the instrument).

Code 7 includes cases where R volunteered that he/she voted "a straight ticket" but no candidate for R's party ran; it also includes cases where R insists that he/she voted for a specific party's candidate but no candidate from that party ran in R's district.

MISSOURI NOTE: In 4 cases in Missouri (IDs 581,1071,1072,1507) Rs voted for Mel Carnihan (deceased). Because this name was not included in the preload, these responses were coded 7.

TELEPHONE: The order in which the names of the major party candidates was read was randomized [see C9(2)].

If an independent/3rd party candidate was on the candidate list, his/her name was read last.

1. <PRELOAD DEMOCRATIC CANDIDATE NAME> --> D1

 V001291 C20. How fair was November election
 MD1: EQ 0, MD2: GE 8
 Numeric

C20.

Please continue thinking about the November election.
 In some countries, people believe their elections are
 conducted fairly. In other countries, people believe
 that their elections are conducted unfairly. Thinking
 of the presidential election we've just had, do you
 believe it was very fair, somewhat fair, neither fair
 nor unfair, somewhat unfair, or very unfair?

 This variable was added 11/10/2000.

1. VERY FAIR
2. SOMEWHAT FAIR
3. NEITHER FAIR NOR UNFAIR
4. SOMEWHAT UNFAIR
5. VERY UNFAIR

FTF:

Please look at page 1 of the booklet.
 I'd like to get your feelings toward some of our political leaders and other people who are in the news these days. I'll read the name of a person and I'd like you to rate that person using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favorable and warm toward the person. Ratings between 0 degrees and 50 degrees mean that you don't feel favorable toward the person and that you don't care too much for that person. You would rate the person at the 50 degree mark if you don't feel particularly warm or cold toward the person. If we come to a person whose name you don't recognize, you don't need to rate that person. Just tell me and we'll move on to the next one.

TELEPHONE:

I'd like to get your feelings toward some of our political leaders and other people who are in the news these days. I'll read the name of a person and I'd like you to rate that person using something we call the feeling thermometer. The feeling thermometer can rate people from 0 to 100 degrees. Ratings between 50 degrees and 100 degrees mean that you feel favorable and warm toward the person. Ratings between 0 degrees and 50 degrees mean that you don't feel favorable toward the person. Rating the person at the midpoint, the 50 degree mark, means you don't feel particularly warm or cold toward the person. If we come to a person whose name you don't recognize, you don't need to rate that person. Just tell me and we'll move on to the next one.

V001384 G10/G10.T. Reform Party placemnt lib-con
MD1: EQ 0, MD2: GE 8
Numeric

G10/G10.T.

FTF:

Where would you place the Reform Party on this scale?

TELEPHONE:

What about the Reform Party?

(Do you think they are extremely liberal, liberal, slightly liberal, moderate or middle of the road, slightly conservative, conservative, or extremely conservative?)

[DON'T PROBE DK]

The order in which G8-G10/G8.T-G10.T were administered was randomized.

Randomization: Randomization is documented within the collection of randomization variables that appear at the end of the Pre survey vars. The question numbers for randomization variables closely follow survey question numbers, preceded by "Rand" [e.g. for questions A4/A5 there is a randomization variable Rand.A4/A5].

1. EXTREMELY LIBERAL
2. LIBERAL
3. SLIGHTLY LIBERAL
4. MODERATE; MIDDLE OF THE ROAD
5. SLIGHTLY CONSERVATIVE
6. CONSERVATIVE
7. EXTREMELY CONSERVATIVE

.....

G11/G11.T.

FTF:

Please look at page 3 of the booklet.

Some people think the government should provide fewer services even in areas such as health and education in order to reduce spending. Suppose these people are at one end of a scale, at point 1. Other people feel it is important for the government to provide many more services even if it means an increase in spending. Suppose these people are at the other end, at point 7. And, of course, some other people have opinions somewhere in between, at points 2,3,4,5 or 6.

TELEPHONE:

Some people think the government should provide fewer services, even in areas such as health and education in order to reduce spending. Still others feel it is

important for the government to provide many more services even if it means an increase in spending.

MD1: EQ 0, MD2: GE 8
Numeric

G12c2/G12c2.T.

IF VA05:

IF INDEPENDENT INCUMBENT CANDIDATE NOT CODED 997 IN D1H THERMOMETER:

FTF:

Where would you place (VA05: <INDEPENDENT INCUMBENT
HOUSE CANDIDATE>) (on abortion)?

TELEPHONE:

What about (VA05: <INDEPENDENT INCUMBENT HOUSE
CANDIDATE>) (on abortion)?

Which opinion best agrees with <HIS/HER> views?

[DON'T PROBE DK]

G12c(1)/G12c(1).T was administered in all districts except
VA05; in VA05, G12c(2)/G12c(2).T was administered.

FTF: The order in which G12b(1)/G12b(2) AND
G12c(1)/G12c(2) were administered was randomized.

TELEPHONE: The order in which G12b(1).T/G12b(2).T and
G12c(1).T/G12c(2).T were administered was randomized.

Randomization: Randomization is documented within the
collection of randomization variables that appear at the end of
the Pre survey vars. The question numbers for randomization
variables closely follow survey question numbers, preceded by
"Rand" [e.g. for questions A4/A5 there is a randomization
variable Rand.A4/A5].

1. BY LAW, ABORTION SHOULD NEVER BE PERMITTED. --> G12b or G13
2. THE LAW SHOULD PERMIT ABORTION ONLY IN CASE
OF RAPE, INCEST, OR WHEN THE WOMAN'S LIFE IS

Some people think that certain groups have too much influence in American life and politics, while other people feel that certain groups don't have as much influence as they deserve. I am going to read you a list of groups, for each one please tell me whether that group has too much influence, just about the right amount of influence or too little influence.

K12/K12.T.

FTF:

Please look at page 5 of the booklet. Some people say that the best way to reduce crime is to address the social problems that cause crime, like bad schools, poverty and joblessness. (Suppose these people are at one end of a scale, at point 1.) Other people say the best way to reduce crime is to make sure that criminals are caught, convicted and punished. (Suppose these people are at the other end, at point 7.) And, of course, some other people have opinions somewhere in between at points 2,3,4,5 or 6.

TELEPHONE:

Some people say that the best way to reduce crime is to address the social problems that cause crime, like bad schools, poverty and joblessness. Still others say the best way to reduce crime is to make sure that criminals are caught, convicted and punished.

FTF:
Please turn to page 8 of the booklet.
Now I have some questions about different groups in our society. I'm going to show you a seven-point scale on which the characteristics of the people in a group can be rated.
In the first statement a score of 1 means that you think almost all of the people in that group tend to be "hard-working." A score of 7 means that you think most people in the group are "lazy." A score of 4 means that you think that most people in the group are not closer to one end or the other, and of course, you may choose any number in between.

TELEPHONE:

V001585 R4d/R4d.T. Trustworthy- Asian-American
MD1: EQ 0, MD2: GE 8
Numeric

R4d/R4d.T.

FTF:

(Still looking at page 10 of the booklet),
Where would you rate Asian-Americans on this scale?

TELEPHONE:

Where would you rate Asian-Americans on a scale of 1 to 7? (Where 1 indicates trustworthy, 7 means untrustworthy, and 4 indicates most Asian-Americans are not closer to one end or the other.)

TRUSTWORTHY RATING - ASIAN-AMERICANS

The order in which groups R4b-R4d/R4b.T-R4d.T were administered was randomized.

Randomization: Randomization is documented within the collection of randomization variables that appear at the end of the Pre survey vars. The question numbers for randomization variables closely follow survey question numbers, preceded by "Rand" [e.g. for questions A4/A5 there is a randomization variable Rand.A4/A5].

Now we'd like to talk to you about Bill Clinton.

=====

V001590 S1. Budget deficit lar/smaller since 1992
MD1: EQ 0, MD2: GE 8
Numeric

S1.

As you know, Bill Clinton was first elected President in
November 1992. He will soon be leaving office after
8 years as President. The next several questions ask
whether you think things have changed since Clinton came
into office.
First, would you say that compared to 1992, the federal
budget deficit is now smaller, larger, or about the same?

Respondents were randomly assigned either to the retrospective assessments battery (S1-S11) or the affects and traits battery (S14-S15). If R did not get selected for the retrospective battery in the Post election instrument they were assigned to administration in the Pre (Q1-Q11) and vice versa.

Post-Rand.C9(2).

Order of Dem and Repub names in Vote section

On 11/16/00 it was discovered that the survey instrument program had an error in setting randomization. Interviews --or, for some interviews administered over several days, portions of interviews --that were conducted prior to the correction of this error (in the 2nd VQ released on 11/16/00) were not administered with correctly functioning randomization. All cases administered prior to the correction of this error were administered as if only one choice in the randomization were available (in almost all cases, an identical choice). Item Post-Summary.24 (V000262) can be used to identify such cases; for these cases, their unrandomized order is represented here.

1. Democratic names first (FTF: BLUE BALLOT CARD)
 2. Republican names first (FTF: GOLD BALLOT CARD)

Post-Rand.D2e.

Order of Blacks in Post Group Thermometers D2a-D2z

On 11/16/00 it was discovered that the survey instrument program had an error in setting randomization. Interviews --or, for some interviews administered over several days, portions of interviews --that were conducted prior to the correction of this error (in the 2nd VQ released on 11/16/00) were not administered with correctly functioning randomization. All cases administered prior to the correction of this error were administered as if only one choice in the randomization were available (in almost all cases, an identical choice). Item Post-Summary.24 (V000262) can be used to identify such cases; for these cases, their unrandomized order is represented here.

Order of Jews in Post Group Thermometers D2a-D2z

On 11/16/00 it was discovered that the survey instrument program had an error in setting randomization. Interviews --or, for some interviews administered over several days, portions of interviews --that were conducted prior to the correction of this error (in the 2nd VQ released on 11/16/00) were not administered with correctly functioning randomization. All cases administered prior to the correction of this error were administered as if only one choice in the randomization were available (in almost all cases, an identical choice). Item Post-Summary.24 (V000262) can be used to identify such cases; for these cases, their unrandomized order is represented here.

Post: Order of Leadership in Clinton traits S15a-S15g.

On 11/16/00 it was discovered that the survey instrument program had an error in setting randomization. Interviews --or, for some interviews administered over several days, portions of interviews --that were conducted prior to the correction of this error (in the 2nd VQ released on 11/16/00) were not administered with correctly functioning randomization. All cases administered prior to the correction of this error were administered as if only one choice in the randomization were available (in almost all cases, an identical choice). Item Post-Summary.24 (V000262) can be used to identify such cases; for these cases, their unrandomized order is represented here.
